

Equipment Checkout System

Requirements Revision History

Change log for all requirement documents

Document status: Active

Last updated: July 13, 2026

1. Purpose

This document tracks all changes, clarifications, and additions made to the Equipment Checkout System requirements over the course of the project. Each entry references the meeting or event that prompted the change, the affected sections, and whether the item was a clarification of existing scope or a net-new/changed requirement.

2. Change Type Legend

Type	Meaning
Clarification	Existing requirement — more detail added. No scope change.
New Requirement	Functionality not previously documented.
Change	Existing requirement modified or replaced.

3. Revision Log

v1.0 — June 25, 2026 — Initial requirements baseline

Source: Internal project kickoff. Meeting notes and initial client brief.

#	Area	Type	Summary
1.1	All sections	Baseline	Initial requirements document created from kickoff meeting notes.

v1.1 — July 13, 2026 — Client review meeting

Source: Client meeting. Notes transcribed and reviewed post-meeting.

#	Area	Type	Summary
1.1	Calendar / Scheduling	Clarification	Calendar views must be based on the school's academic calendar. Holidays and non-operating days will be blocked — no pickup or drop-off appointments available on those days.

#	Area	Type	Summary
1.2	Reservation — Location	Clarification	Location selection must occur early in the reservation flow (first or second step). All items on a single reservation must be from the same location. Previously documented but UX placement now confirmed.
1.3	Late Fees	Clarification	Late fee rate confirmed at \$5/item/day. Previously documented but now paired with the new 4-day checkout window (see 1.4).
1.4	Crew / Producer Checkout	Clarification	Crew/producer checkout is now a full group reservation flow (not just a day-of checklist split). See new requirement 2.5 for full detail.
2.1	Reservation — Pickup & Return	New Requirement	Students must book both a pickup time AND a drop-off/return time at the point of making the reservation (not separately).
2.2	Reservation — Lead Time	New Requirement	Student reservations must be made a minimum of 2 weeks in advance of the pickup date. Admins can override this and create same-day pickup reservations.
2.3	Reservation — Checkout Duration	New Requirement	Maximum checkout period is 4 days. Late fees accrue at \$5/item/day after the return due date.
2.4	Admin — Reservation Controls	New Requirement	Admins can edit nearly all reservation fields: change pickup time (including same-day), change the checkout student, add or remove items, and remove fees.
2.5	Users — Student Notes & Strikes	New Requirement	Admins can add notes to a student's profile. A 3-strike system is in place (strikes for: damaging items, consistent late pickups/drop-offs, in-class behavioral issues). Strikes are at admin discretion. 3 strikes = account block (checkout privileges suspended).
2.6	Worker — Reservation Controls	New Requirement	Workers can create same-day reservations. Workers can add or remove items from an in-progress (active) reservation.
2.7	Capstone Projects	New Requirement	Students can flag a reservation as a capstone project. If flagged, a pre-meeting scheduling step is unlocked — the student schedules a pre-meeting with staff before pickup to review equipment needs. Pickup cannot be confirmed until the pre-meeting is completed.
2.8	Crew / Group Reservations	New Requirement	A producer (lead student) can create a group reservation, assigning roles and specific items to individual crew members. Each crew member is notified they are part

#	Area	Type	Summary
			of a crew reservation. Both the producer and crew members can edit their own pickup time (not the date) and remove items (but not add items). The producer retains full control.
